

The right gear — the right results

Is your cargo hold cleaning equipment fit-for-purpose?

The best cleaning chemicals in the world are only as good as the equipment they are used with. Without the right equipment, it is common to spend excessive time and effort on cleaning.

The Unitor™ Cargo Hold Cleaning Kits are tailor-made for our chemicals, enabling you to benefit from high performance within the shortest time frame. It perfectly complements our newly launched chemicals, Unitor™ CargoClean HD and CargoBarrier HD – both proven to ease the cleaning job for your crew and save time efficiently.

Remove stubborn stains easily

For the toughest and most stubborn stains that have accumulated over time, the right equipment to use is the Unitor™ HPCE Anaconda Lance Kit in combination with the HPCE 520 machine and heating unit. With our featured Cargo Hold Cleaning solution, your crew can achieve the best cleaning results every single time.

Featured Products:

HPCE Anaconda Lance Kit
Product No. 721097

Panamax Cargo Hold Cleaning Kit
Product No. 778855

HPCE 520 INOX
Product No. 721520

Cargo Hold Compact Kit
Product No. 778955

Why is cleaning equipment so important?

By using fit-for-purpose cleaning equipment, you can pull the best performance out of the chemicals and reduce overall chemical consumption.

The Cleaning Diagram on the right shows the four variable factors of a cleaning process: time, temperature, equipment, chemicals. They work together in a synergy to produce the desired cleaning effect. **Since they depend on each other's ratio, a decrease in any one factor can be compensated by an increase in another.** However, if your equipment is inefficient, simply increasing the usage of chemicals and time spent will be unsustainable, the extent of increasing water temperature is also limited.

Our combination of the ideal cleaning equipment and chemicals can help you cut cleaning time significantly, so you can get your cargo hold ready swiftly.

Co-dependent factors of a cleaning process

Achieve the best cleaning results and save on operational costs

Our equipment is designed for cargo hold cleaning in the tough marine environment, maximising durability and readiness for the next job. The best part? They are easy to use and they come with handy user guides, so your crew can work independently; you no longer need to hire expensive cleaning gangs to come on board.

Wilhelmsen Ships Service continuously develops and improves on a wide range of high quality Unitor™ cargo hold cleaning equipment and chemicals. Achieve the best cargo hold cleaning results with us today.
