

Unitor™ CargoClean HD

Less is more with new Heavy Duty cargo hold cleaner

Stubborn Stains from the Dirtiest Cargoes

Dirty cargoes tend to create stubborn stains that require strong chemicals to remove. For tough jobs like these, you need tough chemicals.

But if the chemicals you choose are too harsh, the cargo hold wall coatings will get eroded very quickly. Discharging into the ocean will harm the marine environment as well, landing you in a state of non-compliance.

Yet the current solutions of regular detergents are not strong enough for the clean job and massive quantities are required to achieve the desirable result, incurring higher operational costs over time.

To solve this dilemma, we have created Unitor™ CargoClean HD (Heavy Duty), a unique alkaline cleaner that removes even the toughest stains made by cargoes such as petcoke or coal, ensuring the cleanest result time after time while keeping the cargo hold coating completely safe.

- Requires only half the amount of chemicals due to high concentration, recommended dosage rate only 10%

- Unique alkaline cleaner produces best results and does not damage common hold coatings

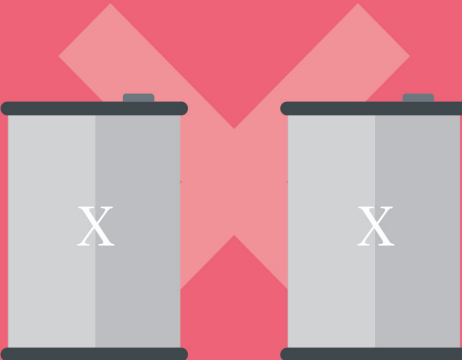

- Cleaning detergent in wash water is not harmful to the marine environment and can be discharged as per Marpol Annex V
- Less plastic waste

Now: use only half the volume previously needed

Brand X

To obtain acceptable results, typical detergents require 20% or more active components

Unitor™ CargoClean HD

Unitor™ CargoClean HD only requires 10% active components to achieve even better cleaning results

=

Not harmful to marine environment

Unlike many products on the market containing HME (Harmful to the Marine Environment) chemicals such as Sodium Hypochlorite, better known as bleach, Unitor™ CargoClean HD can be discharged at sea along with wash water, being fully compliant with the EU Detergent Regulation and Marpol Annex V.

Best in Test

Tested extensively both in the lab and in the hold, Unitor™ CargoClean HD consistently produced the best cleaning results. Specifically designed for the dirtiest cargoes such as heavy coal and petcoke residues, it removes often difficult stains at the first attempt without pre-wash.

For even better results, our Unitor™ Cargo Hold Cleaning Kits create a dense foam which prolongs the chemical's contact time with the stain, so you can have the best cleaning results while reducing the cleaning time even further.

Achieve visibly clean cargo holds today with less time and chemicals, with the new Unitor™ CargoClean HD.

Less is more with new Heavy Duty cargo hold cleaner

An Unrivalled Global Network

Global availability in key ports enables:

-  Onboard support by our Port Service Engineers
-  The right equipment along with the chemicals
-  Reduced time spent on sourcing
-  Familiarized crew members working with consistent, standardized solutions every time

*Current stock locations for Unitor™ CargoClean HD:

- Algeciras
- Colon
- Fujairah
- Houston
- Los Angeles
- New York
- Rio de Janeiro
- Antwerp
- Dubai
- Hamburg
- Istanbul
- Nanjing
- Port Said
- Shanghai
- Busan
- Durban
- Hong Kong
- London
- New Orleans
- Rotterdam
- Singapore

* Please note that stock locations may change and availability is subject to confirmation at the time of order. Please contact your WSS representative for more information.
