Simplify mooring with Timm's digital application "Line Management Plan"

Effortlessly meet regulatory requirements while improving efficiency and safety.

Manual Line Management is holding you back. Often companies are facing the below challenges:

⊗ Failing inspections due to incomplete or outdated records.

⊗ Poorly managed process increase crew fatigue and risk keeping minimum rest hours.

⊗ Lack of clear retirement and replenishment plans raises procurement and logistics costs and adds complexity.

⊗ Insufficient management of mooring lines increases the risk of accidents and endangers your crew.

There's a better way

Traditional Line Management Plan

- Scattered logs and scattered data
- Manual, error-prone logging
- Time wasted finding the right certificates
- Limited visibility of rope conditions

VS

LMP by *by Wilhelmsen*

- Online, all in one place
- Quick and easy logging with just one click
- Organized and unified processes
- Full inventory with clear status and locations
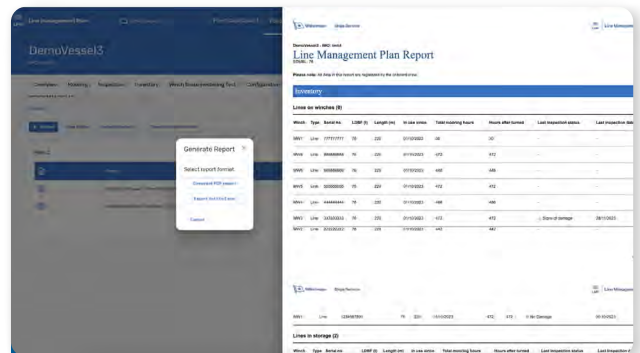

Digital, Hassle-Free Mooring Line Management

Ensure consistent inspections and accurate assessments, every time with the help of AI

Significantly reduce time spent on manual recording

Avoid surprises with predicative planning and reduce replacement costs

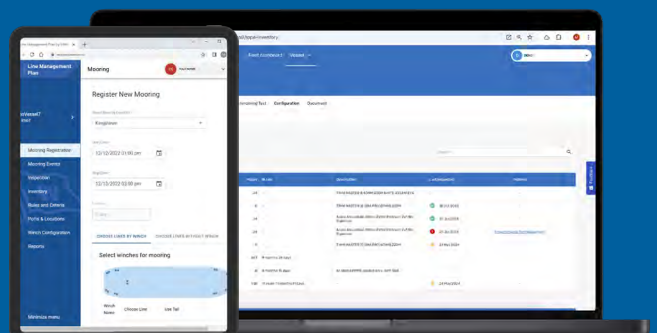

Save hours spent searching for scattered records during audits
