

NAVADAN TORNADO 3 CARGO HOLD CLEANING JET

Product group: 022 Product number: 2000061

The Navadan/Unitor™ Tornado 3™ has been designed for use on board medium to large bulk carriers. Shut off ball valve for both air and water supply is mounted on the Tornado for increased safety and simpler operations.

Product information

The intended use is cleaning and descaling of cargo holds. It uses the suppression pump as a water source. This enables the jet to reach the top of the hold and at the same time giving the capacity needed to remove even the most stubborn dirt or scale.

This is part of the NAVADAN TORNADO KIT (2009030) which includes the full set suitable couplings for air and water supply.

Features

- Stainless steel design
- Swivel connection between gun and tripod
- Works on normal fire line and working air line on board
- High water volume

Benefits

- Long operating life with minimum maintenance
- Easy to set-up and connect without any additional equipment
- Enables crew to clean cargo holds quickly
- Easy to use, aim and transport and does not require any special training

Specification

General

Invent Hazard Material (IMO/IU) classification	NA
--	----

Technical data

Air consumption [m³/min]	2
Air inlet connection [inch]	3/4
Air pressure [bar]	7 recommended
Feed water pressure [bar]	6 recommended
Water inlet connection [inch]	2 FEMALE BSP
