# ARGON E-10 FILLING

Product group: **715**    Product number: **905565**

Argon is used primarily as shielding/backing gas for arc welding (MIG/TIG). This product is delivered in a Unitor cylinder as part of WSS global cylinder exchange program.

## Product information

Technical grade Argon has a purity of 99.99%. This product is delivered in a 10 litre cylinder. Product does not come with a certificate to confirm its purity. An inert gas, it is normally used as a shielding gas in arc welding processes. Beware of asphyxiation hazards when using the gas.

### Features

- Argon is a colourless and odourless gas
- Argon is slightly heavier than air and is an inert gas
- It is non-toxic and non-combustible
- It is used as a shielding gas for welding, primarily to protect the molten pool against contaminants in the atmosphere

### Benefits

- Suitable for MIG and TIG welding applications like welding of stainless steel.
- Small portable cylinder for on-location welding
- For your safety, the product is delivered in a Unitor exchange cylinder complete with barcode and unique cylinder serial number.
- We trace and track all cylinders using our system to give you peace of mind.
- We offer global availability through our Global Exchange Programme.

## Specification

### General

Cylinder Type	E-10
Invent Hazard Material (IMO/EU) classification	NA

### Physical properties

Colour	Grey
--------	------

### Dimensions/Weight

Connection [Size/ Type]	W24.32 MM X 1/14" Ext
Diameter [mm]	140
Gross Weight [kg]	22
Height [mm]	1000
Weight [kg]	3.6 Net

### Technical data

Connection [inch]	W24.32mm x 1/14" RH Ext side
Filling pressure [bar]	200bar
Function	WELDING
Purity	5.0

### Performance data

Gas Capacity [m <sup>3</sup> ]	22
--------------------------------	----

## Documents

[SDoC and MD for IHM](#)
