

Product group: 715 Product number: 905573

Unimix 20 is an Argon-CO2 gas mix with 20% CO2 in Argon used as shielding gas in MIG / MAG welding processes. This product is delivered in a Unitor cylinder as part of WSS global cylinder exchange program.

#### **Product information**

An Argon-CO2 mixture of 20% Carbon Dioxide, 80% Argon. This product is delivered in a 10 litre cylinder. Argon-CO2 mixtures are normally used as a shielding gas in arc welding processes.

#### **Features**

- Argon-CO2 mix is a colourless and odourless gas
- Argon-CO2 mix is slightly heavier than air and is an inert gas
- Argon-CO2 mix is non-combustible
- It's used as a shielding gas for welding, primarily to protect the molten pool against contaminants in the atmosphere 80% Argon/20% CO2 mix is suitable for welding all un/low alloyed carbon steels
- Unimix gives a very stable molten pool together with optimum energy transmission

- Suitable for MAG welding applications where an active shielding gas is required typically for low-alloy steels. For your safety, the product is delivered in a Unitor exchange cylinder complete with barcode and unique cylinder serial number.
- We trace and track all cylinders using our system to give you peace of mind.
- We offer global availability through our Global Exchange Programme.

# **Specification**

## General

Cylinder Type	M-10
Invent Hazard Material (IMO/EJ) classification	NA

## Physical properties

	Colour	grey with yellow shoulder
--	--------	---------------------------

#### Dimensions/Weight

Connection [Size/ Type]	W24.32 MMX 1/14"
Diameter [mm]	140
Gross Weight [kg]	22
Height [mm]	1000
Weight [kg]	4 Net

#### Technical data

Connection [inch]	W24.32mmx 1/14" RH Ext
Filling pressure [bar]	up to 200bar
Function	WELDING
Purity	20 +/- 2% 002
Volume (I)	10

# Performance data

2.2	
-----	--
