

Product group: **716** Product number: **771713**

A single stage regulator for nitrogen reducing the inlet pressure from 200bar to any pressure between 0 and 200 bar. One of the main application used onboard is for pressure accumulators (pressure dampers).

## Product information

This product supersedes product no: **791713**

For use onboard to fill nitrogen accumulators and pressure dampers.

Apart from replacing damaged or faulty gauges, repairs should never be attempted on gas regulators. Faulty, old or corroded regulators should be replaced. Internal seals and membranes will deteriorate with time, and as a rule gas regulators should be replaced with maximum 5 years intervals.

### Features

- Single-stage
- Inlet connection: W24.32mm x 1/14" Int
- Outlet connection: W21.8mm x 1/14" ext (comes with a 1/4" tube connection)
- Max inlet pressure : 200bar.
- Outlet pressure : 0 to 200 bar.

### Benefits

- Reduces cylinder pressure to safe working pressure.
- No need for adjustment during work.
- Comes with easy hose connection.

## Specification

### General

Invent Hazard Material (IMO/EU) classification	NA
--	----

### Dimensions/Weight

Connection [Size/ Type]	W24.32 mm x 1/14"
-------------------------	-------------------

### Technical data

Outlet connection [inch]	1/4" (6.3mm) high pressure copper tube
--------------------------	--

### Performance data

Working Pressure	0 - 200 bar
------------------	-------------
