Approved for use with MARINFLOC bilge water cleaning systems

Documents

[SDoC and MD for IHM](#)

Directions for use

Applications Unitor™ Multiclean™ may be used in all types of cleaning and degreasing operations and is effective against oil, grease, and many other difficult soils. Unitor™ Multiclean™ can be used neat or diluted with water or paraffin and may be applied by brush swab or spray. It may also be used in immersion tanks. The product should be allowed to stay in contact with the soil to be removed for 15-30 minutes to allow penetration before flushing with water.

Dilution:

It is recommended to test different concentrations on a small area to find the optimal effect on the contaminated surface.

The typical dosage for light contamination is about 1-5% and for heavy contamination up to 30%.

For safe handling and optimal dilution, we recommend the use of the UNITOR 4 CHEMICALS DILUTION STATION.
