# DIESELPower CFPP 25 LTR

Product group: **650** Product number: **779112**

Unitor™ DieselPower™ CFPP improve cold weather operability and cold flow properties of marine distillate fuels. Unitor™ DieselPower™ CFPP help to reduce the size of waxes formed and reduce the risk of wax sedimentation in fuel tanks.

## Product information

This product supersedes product no: **779108, 778405**

A distillate fuel contains paraffins. The paraffins are molecules that tend to come together and form larger structures as the temperature drops in the fuel. The paraffins can also be referred to as wax and a fuel with high wax content will tend to cause wax formation at higher temperatures. Once the wax particles have formed, they are difficult to dissolve back into the fuel.

### Features

- Cold flow improver and pour point depressant
- Delays the onset of paraffin crystallization to improve cold flow properties

### Benefits

- Enables you to handle the fuel at lower temperatures
- Adds safety in handling of the fuel by reducing the pour point and the Cold Filter Plugging Point of the fuel
- Keep the wax in suspension preventing wax sedimentation and accumulation

## Specification

### General

|  |     |
|--|-----|
| Invent Hazard Material (IMO/EL) classification | C-6 |
|--|-----|

### Physical properties

|                               |        |
|-------------------------------|--------|
| Density [kg/dm <sup>3</sup> ] | 0,90   |
| Flash Point [°C]              | >60    |
| Form                          | Liquid |
| Pour Point [°C]               | -6     |

## Documents

## Directions for use

Unitor DieselPower CFPP should be dosed to the fuel tank prior to filling. Recommended dosage is one litre to one thousand litre of fuel (1:1000 or 1000 ppm). In case of poor response dosage can be increased to one litre to five hundred litre of fuel (1:500 or 2000 ppm)

Please note: The dosing temperature should always be at least 5oC above the measured cloud point of the fuel.

| Dosage of product | 1 ton fuel bunkered | 10 ton fuel bunkered | 50 ton bunkered | 100 ton bunkered |
|-------------------|---------------------|----------------------|-----------------|------------------|
| 1000 ppm          | Dose 1 ltr          | Dose 10 ltr          | Dose 50 ltr     | Dose 100 ltr     |
| 2000 ppm          | Dose 2 ltr          | Dose 20 ltr          | Dose 100 ltr    | Dose 200 ltr     |
