

POTABLE WATER TEST KIT

Product group: **661** Product number: **778419**

The Nalfleet Potable Water Test Kit range enables ships staff to monitor the quality of the drinking water on board the ship by providing tests for important operational control parameters and verification tests for bacteria that can be of risk to human health.

Product information

This product supersedes product no: **777720, AND, 777721**

Diseases on board ships

Improperly managed water is an established route for infectious disease transmission on ships. This was illustrated in a review of more than 100 outbreaks associated with ships undertaken by Rooney et al. (2004). One fifth was attributed to a waterborne route.

WHO "Guide to Ship Sanitation" (Third Edition)

"A ship operator's role is to provide safe water to passengers and crew, fit for all intended purposes. Water on board should be kept clean and free from pathogenic organisms and harmful chemicals. Responsibilities are to monitor the water system, particularly for microbial and chemical indicators, to report adverse results under the IHR 2005, where required, and to take corrective action".

Maritime Labour Convention 2006

The Marine Labour Convention (MLC) 2006 is the platform for the International Labour Organisation (ILO) to implement standards for the employment and living conditions for workers in the marine industry. These standards include the requirement that "Each member shall adopt laws and regulations or other measures to provide minimum standards for the quantity and quality of food and drinking water and for the catering standards that apply to meals provided to seafarers on ships that fly its flag, and shall undertake educational activities to promote awareness and implementation of the standards referred to in this paragraph." (Standard A3.2 Food and Catering)

Features

- Self contained testing kit for E Coli and Coliforms
- Helps you to meet MLC 2006 recommendations for the quality of drinking water
- Includes compact and robust sample incubator
- Training video included

Benefits

- Incubator ensures that you achieve consistent test results
- Additional test kits can be added as required to meet flag state and/or company requirements
- Video supports you with crew training and competency

Specification

General

Invent Hazard Material (IMO/EU) classification	C-9
--	-----
