

Product group: 663 Product number: 735756

Consumables: Mylar film for sample cups. Not suitable for light elements analysis

Product information

Our field-portable XRF analyser, the X-MET8000, combines a high performance X-ray tube and large area silicon drift detector (SDD) to deliver the speed and performance needed for the routine determination of sulfur in fuels.

Test Parameter: Sulfur

Used with:

- 1. X-MET 8000 SULFUR IN OIL ANALYSER (735732)
- 2. SAMPLE CUP SET X-MET 8000 (735752)

Features

- Complies with ASTM D4294, ISO8754 and IP336 sulfur test methods

Benefits

- Take the analyser from ship to ship, port to port (ideal for port authorities)
