

Product group: **661** Product number: **777180**

Photometers are the all-rounders in water analysis. They measure the concentration of a substance based on the light that passes through a water sample. They are user-friendly and designed to meet the individual requirements of the user and the respective application.

This ensures not only assured measurement results in accordance with the applicable regulations, but also precise values and tools for documentation and general quality control.

Product information

This product supersedes product no: **768130**

A hand held spectrophotometer that can be used to produce a wide range of accurate water tests. This instrument offers a unique ability in that it can be used, dependent upon parameter, with liquids, powders, tablets, or powder sachets. It operates a six filter system for greater accuracy and uses a LED light source, keeping power consumption low.

Test Parameters: Various

Features

- Uses tablets, powder packs, liquids or vials
- Wide range of test parameters
- Reproducible results
- Results displayed as ppm (mg/l)

Benefits

- Flexibility with multiple testing ranges and methods available
- Reliable and accurate measurement results

Specification

General

Invent Hazard Material (IMO/EU) classification	C-9
--	-----
