SULPHITE TEST KIT

Product group: **661** Product number: **574913**

Consumables: Sodium sulphite (Na₂SO₃) is widely used for oxygen scavenging. Sodium sulphite has been found satisfactory at pressures up to about 62 bar (900 psig). Above these pressures decomposition products such as H₂S and SO₂ can affect steam purity.

Monitor and control the sulphite level in your boiler water will be important to ensure corrosion protection.

Product information

Test kit for the determination of Sulphite levels in Boilerwater.

Test Parameter: Sulphite

Specification

General

Invent Hazard Material (IMO/IU) classification	C-9
--	-----

Documents

[SDoC and MD for IHM](#)
