CORROSION TREAT CARTRIDGE 20"

Product group: **654** Product number: **735127**

Nalfleet CORROSION TREAT CARTRIDGE 20" is an innovative corrosion inhibitor product designed to reduce corrosion in potable water distribution system.

Product information

Features

- Designed for to be used for the following operating conditions, maximum flow rate < 2.3 m3/hr, maximum pressure < 8.0 BarG, maximum temperature: < 45.0 Deg C
- Material: Phosphate based inhibitor suitable for potable water
- Product complies to with DM25, ACS and NSF/ANSI/CAN 60 standards

Benefits

- Prevent corrosion products/sediments carryover
- Reduce potable water red water events and inhibit corrosion on potable water distribution
- Reduce maintenance related activities due to potable water corrosion.
- Contribute to potable water system and distribution pipeline and asset protection

Specification

General

Invent Hazard Material (IMO/IU) classification	
--	--

Physical properties

Appearance	bead of crystal
Density [g/ml]	1.67
Form	Solid
pH	6.5 - 7.5 (as 1% Solution)

Documents

[735127 \(SDoC And MD For IHM\)](#)

[Corrosion Shield 20-1 Installation & Maintenance Manual V1 270924](#)

Directions for use

Pls. Refer to Corrosion Shield 20-1 Installation & Maintenance Manual V1 270924
