

# pH INCREASER 25KG

Product group: **657**    Product number: **766537**

NALFLEET™ pH Increaser™ is a convenient and safe Sodium Carbonate, granular product for raising the pH of pool water with minimal effect on overall alkalinity.

## Product information

This product supersedes product no: **625657**

This product is used to raise the pH of pool water. Proper pH control is essential to eliminate problems caused by pH being too low or too high. If pH is too low then corrosion and staining may occur.

### Features

- Convenient granular product
- Protects pool surfaces and equipment from corrosion due to low pH
- Reduces maintenance costs
- Quickly and easily raises pH

### Benefits

- Safe for all types of pools
- Makes water more comfortable for bathers

## Specification

### General

<b>Invent Hazard Material (IMO/EU) classification</b>	NA
<b>Product catalog URL</b>	<a href="https://www.wilhelmsen.com/product-catalogue/products/marine-chemicals/water-treatment-chemicals/pool-chemicals/ph-increaser-25kg/?epieditmode=true">https://www.wilhelmsen.com/product-catalogue/products/marine-chemicals/water-treatment-chemicals/pool-chemicals/ph-increaser-25kg/?epieditmode=true</a>

### Physical properties

<b>Appearance</b>	White
<b>Form</b>	Granular
<b>pH</b>	11.6 in 1% solution

### Technical data

<b>Solubility in water</b>	Soluble
----------------------------	---------

## Directions for use

If your pool pH is low, add pH Increaser at 25g to 50g per m<sup>3</sup>. Distribute the powder over the whole of the pool surface, starting in the deep end. Make sure that the pump is circulating to distribute the water. Wait an hour or so before testing again. If the pH is still too low after an hour, you can add more pH Increaser. The powder may cloud the pool water at first, but this should fade out within an day or so.
