pH INCREASER 25KG

Product group: **657** Product number: **766537**

Efficient pH Control for Optimal Pool Water Quality

pH Increaser is a convenient and safe granular Sodium Carbonate product designed to raise the pH of pool water with minimal impact on overall alkalinity. Proper pH control is essential to prevent issues such as corrosion and staining, ensuring a safe and enjoyable swimming experience.

Product information

This product supersedes product no: **625657**

Why Choose pH Increaser?

Choosing pH Increaser means opting for reliable pH control that ensures optimal water quality by effectively raising pH levels. Its granular form allows for straightforward application and handling, making it easy to use. By helping to maintain the integrity of pool surfaces and equipment, it protects your investment and reduces the need for costly repairs.

Invest in pH Increaser today to maintain the perfect pH balance in your pool water. Ensure a safe, comfortable, and enjoyable swimming environment with our high-quality solution.

Features

Convenient Granular Form: Easy to handle and apply. Protects Pool Surfaces and Equipment: Prevents corrosion and staining caused by low pH levels. Cost-Effective: Reduces maintenance costs by maintaining optimal pH levels. Quick and Effective: Rapidly raises pH levels to the desired range.

Benefits

Safe for All Pool Types: Suitable for use in all types of pools. Enhanced Comfort: Makes water more comfortable for bathers by maintaining balanced pH levels

Specification

General

Invent Hazard Material (IMO/EU) classification	NA
--	----

Physical properties

Appearance	White
Density [g/ml]	2.53
Form	Granular
pH	11.6

Technical data

Solubility in water	Soluble
---------------------	---------

Documents

[SDoC and MD for IHM](#)

Directions for use

If your pool pH is low, add pH Increaser at 25g to 50g per m3. Distribute the powder over the whole of the pool surface, starting in the deep end. Make sure that the pump is circulating to distribute the water. Wait an hour or so before testing again. If the pH is still too low after an hour, you can add more pH Increaser. The powder may cloud the pool water at first, but this should fade out within an day or so.
