The product is NOT to be used for Potable Water.

Features

- Tablet form
- Slow dissolving

Benefits

- Controlled chlorine release
- Long shelf life

Specification

General

Invent Hazard Material (IMO/EL) classification	C-51
--	------

Physical properties

Available Chlorine	90%
Density [g/cm ³]	2.5
Odour	Faint Halogen
Packing Type	plastic pail x 4
pH	2.7 to 3.3
Physical state	Solid

Dimensions/Weight

Diameter [mm]	74
Thickness [mm]	24
Weight [kg]	

Technical data

Solubility in water	12g/l @ 25 Deg C
---------------------	------------------

Directions for use

Each tablet weighs 200g and has 90% available chlorine release agent which in turn is 45% available chlorine = 80g.

Start by adding 1 tablet per 5m³ of system volume, wait a couple of hours then test for free chlorine. Repeat until the required free chlorine level is achieved. Typically 1 - 2mg/l Free Chlorine.
