NALFLEET™ Potable Water Stabiliser Liquid™ is a combination of polyphosphates, having stabilising properties. The product effectively and economically provides scale and corrosion control in potable water and other shipboard once-through water systems.

**Product information**

This product supersedes product no: 777188

**Features**

- Prevents 'Red Water' in the ship's potable water systems
- Controls corrosion and scaling in pipelines and other equipment handling softened or evaporated water
- Supplied in convenient to use liquid form

**Benefits**

- Increases system life and reduces maintenance costs

**Approvals**

Approved by The Norwegian Food Safety Authority

**Directions for use**

**Dosing and Control**

NALFLEET™ Potable Water Stabiliser Liquid is non corrosive to ordinary metals used in feeding equipment and may be fed with a simple by-pass feeder or suitable chemical dosing pump. Typical dosage rate is 15 to 25mls/m³ water. Storage temperature should not exceed 40°C.

NALFLEET™ Potable Water Stabiliser Liquid meets the requirements of the UK Department of Trade and Industry for use in potable water.
