

Product group: 659      Product number: 777714

NALFLEET™ Potable Water Stabiliser Liquid™ is a combination of polyphosphates, having stabilising properties. The product effectively and economically provides scale and corrosion control in potable water and other shipboard once-through water systems.

Product information

This product supersedes product no: 777188

Features

- Prevents "Red Water" in the ship's potable water systems
- Controls corrosion and scaling in pipelines and other equipment handling softened or evaporated water
- Supplied in convenient to use liquid form

Benefits

- Increases system life and reduces maintenance costs

Specification

General

Invent Hazard Material (IMO/EU) classification	C-7
--	-----

Physical properties

Density [g/ml]	1.22 to 1.28
Form	Liquid
Freezing Point [°C]	<1
pH	5.0 - 10.0

Approvals

Certified by NSF to NSF/ANSI/CAN Standard 60 - Drinking Water Treatment Chemicals - Health Effects. Maximum use level according to NSF approval: 9 mg/lit.  
Approved by The Norwegian Food Safety Authority

Directions for use

Dosing and Control

NALFLEET™ Potable Water Stabiliser Liquid is non corrosive to ordinary metals used in feeding equipment and may be fed with a simple by-pass feeder or suitable chemical dosing pump. Typical dosage rate is 15 to 25mls/m3 water. Storage temperature should not exceed 40 C.

NALFLEET™ Potable Water Stabiliser Liquid meets the requirements of the UK Department of Trade and Industry for use in potable water.
