The diaphragm pump is built with the highest quality precision parts. Long lasting, even when used with abrasive fluids, making this pump very cost effective. Professionals turn to this pump because it offers an easy, hands-off solution to your fluid handling needs.

Product information

This is the highest capacity double diaphragm pump in its price class. With all the same durable features of the smaller model, the 1590 has 1,5"npt ports that can take on the heavier, more viscous materials and pump them faster with greater tolerance for suspended solids. Model 1590 has an air valve system that is 100% serviceable without disassembly of the wetted parts, saving valuable maintenance time. This pump requires no air line lubrication, which also saves money.

- Highest reliability air valves for no stall operation
- No Lube air valves reduce routine maintenance
- High flow design with complete range of diaphragm options
- Rugged construction for long, trouble free performance
- Ideal for spill response and all types of transfer applications

Typical fluids handled by this pump:

- Oil: Light oil, gear oil, mineral oil
Fuel: Diesel, leaded petrol/gasoline, fuel oil
Other: Seawater/brine, general waste water, white spirit, alcohol

Features

- Easy maintenance
- Fluid compatibility
- Unique, patented air valves
- Precision-fitted parts

Benefits

- Quick priming and immediate flow of product
- Handles fluid viscosities up to 5000 cps and solids up to 3/16 in (4,8 mm)
- Excellent for abrasive, low-to-medium viscosity fluids and shear sensitive materials
