MOBILE GREASER FOR 50-60KG DRUMS

Product group: **422** Product number: **711715**

The 60:1 features a unique air motor that enables quiet and reliable operation as well easy maintenance.
The pump is recommended for mobile units and piped installations of moderate length, and are designed to dispense greases up to NLGI 3.

Product information

This product supersedes product no: **711309**

The air operated pump has two main parts. One double acting air motor driving and a single acting high pressure pump mechanism. The grease is fed into the pump tube by the piston on the upward stroke and is pushed out through the check valve on the down stroke. The relationship between the areas of the air piston and the pump piston decides the pressure ratio. The pressure ratio is 60:1 and the theoretical static pressure when the pump has stopped is 60 times higher than the air pressure.

The pump package includes a 2" bunge adapter for mounting the pump on top of the drum cover as well as a hose and applicator gun. The 50 kg unit is, in addition, supplied with a trolley for easy transport of the heavy grease drums.

The 4 meter 3/8" hose has a inner tube of synthetic oil resistant layer. Outer layer is made of durable weather and oil resistand rubber. Reinforced by two braids of compact steel wire.

Features

- Includes handy trolley easy to maneuver
- The fluid section features a double-acting piston design
- New pump design
- Reduced weight

Benefits

- Fast grease transfer, saving time
- Fits several sized drums
- Even and steady flow of grease
- 30% increase in performance
- 30% weight reduction

Specification

General

Invent Hazard Material (IMO/EU) classification	NA

Dimensions/Weight

Diameter [mm]	30 Pump tube
Length [mm]	750 Pump tube
Weight [kg]	4.6

Technical data

Air inlet connection [inch]	1/4
Air pressure [bar]	10 maximum
Ratio	60:1
