

Product group: 604 Product number: 547588

The oil differential pressure switch is a safety device used in the refrigeration system to protect against low lubricating oil pressure. If the oil pressure fails, the switch will stop the compressor after a predetermined time period has elapsed.

Product information

Features

- Protects compressor
- Time delay 45 seconds
- 1/4" flare connection
- Vibration and shock resistant

Benefits

- High reliability both electrically and mechanically
- High quality

Specification

General

Invent Hazard Material (IMO/EU) classification	NA
Product code	060B0170

Dimensions/Weight

Connection [Size/ Type]	1/4 FLARE
-------------------------	-----------

Technical data

Function	TIME DELAY 45 SEC
----------	-------------------

Documents

[SDoC and MD for IHM](#)
