## Product information

This product supersedes product no: **410656**

Timm Winchline is constructed with a 12-strand core of B5 polyolefin yarn, and a tight 32 braided cover of HT polyester providing superior abrasion resistance and reducing snap-back. 12-strand ropes are regarded as the best rope construction, and have become the most common for high performance solutions. The rope is well balanced, with 6 left and 6 right strands. Timm Winchline has a compact construction retaining its firm, round shape during use. It runs very smoothly on winches with minimal compression and prevents digging into the layers underneath. This rope is suitable for both single and multi drum winching, and applications with bits and capstans. Timm Winchline can be used on board all vessel types- developed primarily for Ro-Ro and cruise vessels.

## Features

- Buoyant
- No rotation under load
- UV protected
- Compact construction
- Cover braided construction

## Benefits

- Resistant to external damage and particle ingress
- High abrasion resistance
- Ease of handling
- High construction stability
- Maintains shape even under extreme tension

## Specification

### General

Invent Hazard Material (IMO/EU) classification	NA
--	----

### Physical properties

Colour	White with 3 gold marking yarns
Construction	Load bearing core with protective jacket
Density [kg/m <sup>3</sup> ]	Approx. 0.99
Elongation [%]	18% at break
Melting point	165°C

### Dimensions/Weight

Length [m]	200
------------	-----

### Technical data

Spliced MBL/LDBF [kN]	858
Unspliced MBL [kN]	954
Water absorption [%]	< 1%
