TIMM CHAFE GUARD PRO 3M [M]

Product group: **324** Product number: **411015**

The Timm Chafe Guard Pro is a robust, heavy-duty protection solution designed for the most demanding mooring operations. Engineered for durability, it offers exceptional cut and abrasion resistance, effectively shielding ropes from wear and tear when in contact with rough surfaces.

Product information

The distinctive white blue chafe guards PRO of Timm have been protecting rope assets since 2012. These high tenacity guards are suitable for all rope types (except steel wire). OCIMF states that a rope's ability to "resist external abrasion damage may be improved by the addition of an abrasion resistant overall jacket". It will also "serve to protect from UV exposure". These can be easily installed and can provide an instant defensive barrier against sharp surfaces and edges. The heat resistant properties of PES and HMPE, will also shield your rope from excessive frictional heat build-up. Poorly maintained fairleads and chocks can also severely harm the service life of your mooring lines. Timm would suggest in such circumstances, applying a chafe guard to reduce destructive cutting. The Timm Chafe Guard PRO is highly resistant to mineral acids, alkali, electrolytes, oxidising agents and remains stable in aqueous acids and non-polar solvents. They are cold and frost resistant (rot-proof) and are easily fixed into place with 1m lines at each end and an extra durable velcro lining.

Features

- Suitable for all rope types, except steel wire
- 100% high tenacity PES
- Customised sizes
- High melting point (260°C)

Benefits

- Easy to install
- Eye-catching
- Rot-proof
- Lightweight, with a smooth surface
- Excellent UV and heat resistance

Specification

Physical properties

Construction	Herringbone arrow weave
Melting point	144°C

Performance data

Water resistance	0.3% absorption
-------------------------	-----------------
