# TIMM CHAFE GUARD PRO

The Timm Chafe Guard Pro is a robust, heavy-duty protection solution designed for the most demanding mooring operations. Engineered for durability, it offers exceptional cut and abrasion resistance, effectively shielding ropes from wear and tear when in contact with rough surfaces.

## Product information

The distinctive white blue TIMMChafe Guards PRO are high tenacity guards suitable for all types of synthetic ropes. OCIMF states that a rope's ability to "resist external abrasion damage may be improved by the addition of an abrasion resistant overall jacket". It will also "serve to protect from UV exposure".

TIMMChafe Guards PRO can be easily installed and provide an instant defensive barrier against sharp surfaces and edges. The TIMMChafe Guard PRO can also provide an extra protection against chemical and UV damages on the ropes.

### Features

- Hybrid PES/HMPE material composition
- Lightweight construction
- Excellent abrasion and cut resistance
- Impervious to moisture
- No water absorption

### Benefits

- Easy to install
- Prolonged durability for long lasting protection
- Rot-proof
- Lightweight, with a smooth surface

## Specification

### Physical properties

Construction	Herringbone arrow weave
Density [kg/m3]	1.18
Melting point	144°C

## Ordering information

		Acera Amundsen SBA™		Timm Master 12 SBA™
