Timm Master 8 Tail is an 8-strand floating mooring tail which effectively absorb shock and energy in mooring systems.

# **Product information**

Our best selling mooring tail made from the Timm Master rope design, sold to over 6 000 vessels. Made of HT polyester and B5 polyolefin yarns which effectively absorb shock/energy in mooring systems. Typically used with steel wire and HMPE ropes. Compared to nylon stretchers, this product remains elastic for a longer period. It performs better in wet conditions, providing equal breaking strength under wet and dry conditions.

- Protected eyes
- Buoyant
- High elongation

### **Benefits**

- 15-20% lighter than PES and nylon tails
- Excellent abrasion and UV resistance
  Smooth and gripable surface
  Meets all OCIMF requirements
