

Product group: 096      Product number: 699496

Electrode for welding of cast iron with pure nickel.

Product information

This product supersedes product no: 602946

Nickel electrodes (95% Ni) for welding of gray cast iron to itself or to steel. Especially good for old oil-soaked and corroded cast iron, and also for joining cast iron to steel, copper, copper alloys and stainless steel.

The two types of UNITOR cast iron welding electrode i.e., Nickel-333N (Pure Nickel) and NiFe-334N (Nickel Iron) whereby the pure nickel grade will produce a softer, more malleable weld deposit or lower strength and ductility than those of nickel iron.

Hence, Nickel-333N should be used where maximum machinability of weld deposit is required or where low concentration of weld stresses e.g., these include applications for thin plates, machinery parts, frames and housings.

Features

- Unitor high density polyethylene packing
- Superb arc stability
- Easy slag removal and smooth weld surface
- Very good on oily cast iron

Benefits

- Long storage lifespan without moisture pick up
- Easy to use
- Little surface treatment needed
- Less porosity in deposit resulting in less required grinding

Specification

General

Invent Hazard Material (IMO/EU) classification	NA
--	----

Dimensions/Weight

Diameter [mm]	2.5
Weight [kg]	2

Technical data

AWS	A5.15: EN-C1
Polarity	AC,DC+/-

Performance data

Amperage [A]	110
