

WELDING CABLE 35 MM2 20M

Product group: **195** Product number: **175786**

Welding cable 35mm² 20m with safety cable connectors.

Product information

Welding cables used on board, on deck or in an engine room, are exposed to rough weather, oil and mechanical wear. The welding cable supplied by Unitor has wear, flame and oil-resistant insulation on a polychloroprene rubber basis. It is recognized by its marking at regular intervals with the text "Unitor oil resistant welding cable", size of cable, and the standard for welding cable HO1N2-D.

Features

- Unitor welding cable is oil resistant, flame resistant and wear resistant. The conductor is built up from 0.2mm diameter copper wires to ensure high flexibility
- The Unitor welding cable complies with the harmonised standard HO1N2D for flexible welding cable

The cable is available in cross-section areas 35mm², 50mm² and 70mm², in standard lengths of 10m, 20m and 50m, fitted with Unitor safety connectors, DIX connectors on request

- The standard length cable extensions are fitted with Unitor safety cable connectors for optimal protection. Connection to the machine panel sockets is done with 2 pcs Dix/Unitor conversions

When cable extensions with safety connectors are used the electrode holder and ground clamp with safety connectors should be used

Specification
