

Product group: 197 Product number: 597310

Flowcontrol needle valve for gas flow adjustment.

Product information

The flow-control needle valve used at the gas inlet of the TIG-torch or the wire feeder gives final flow adjustment (more precise flow control).

Features

- Needle valve to control shielding gas flow rate for TIG welding
- Used together with Flowcontrol Meter for Argon

Benefits

- Ensure good welding quality with precise shielding gas flow rate
- Easy manipulation of flow rate close to welder regardless of distance to the gas cylinder/gas outlet (typically when gas cylinder/regulator at distance from work piece)

Specification

General

Invent Hazard Material (IMO/EU) classification	NA
