

Product group: 197 Product number: 200000

The T-200 torch is a lightweight TIG torch (DIX70) well adapted to general applications onboard.

Product information

This product supersedes product no: 676932

Supplied with:

4 m cable/hose package. Separate welding cable and gas hose ensure that extensions may be easily connected
A standard Unitor DIX 70 connector is mounted on the welding cable, and the gas connection fits directly onto the Unitor argon regulator or to the standard right hand threaded screw couplings for gas hoses.

The torch is equipped with a screw type gas valve.

Features

- The torch is rated at a full 200A welding current at 100% duty cycle. At lower duty cycles, higher current may be used
- A screw type gas valve opens fully at only 3/4 turn, switches the gas on and off
- Being gas cooled, the torch has lower weight than water cooled torch
- Unitor supplies nozzles of aluminium oxide (AL2O3), recognizable by the pink colour. These nozzles will stand for higher temperatures than the ordinary ceramic cups, which are recognized by a light brown color. Note that TIG gas nozzles are brittle and may break if dropped or treated carelessly

Benefits

- Easy to operate for repair and maintenance work in all positions
- The handle ensures a secure grip and reduces heat transfer to the welder's hand
- A remote amperage control can be fixed on the TIG torch by velcro straps in order to adjust amperage during welding

This bundle contains:
