

# SAFETY GLASS. 10PCS

Product group: **196**    Product number: **633222**

Safety glass 10pcs 60 x 110mm for arc welding

## Product information

This product supersedes product no: **511964**

A welder should bear in mind that proper protection is absolutely necessary to guard himself against the danger of burns, ultra-violet rays and bits of welding slag in the eye. Unitor face shields for welding are made from a lightweight, robust plastic material which is unaffected by heat, cold or moisture, and both glasses and shields conform to relevant EN standards.

## Specification

### General

Invent Hazard Material (IMO/EU) classification	NA

## Approvals

CE

## Directions for use

### A. Safety glass (polycarbonate)

The glass is used in shields with a flip-up front frame and should be placed nearest to the eyes to protect against slag or other articles while chipping/ grinding when the flip up front is open.

### B. Filter shade glass

Filters out harmful infra-red and ultra-violet rays from the welding arc, and reduces visible light to a level which is sufficient to see the welding process without straining the welder's eyes. Filter Shade Glass should be selected based on welding process and amperage. The glasses are marked Protane Shade SO 1 DIN 0196 CE

### C. Protection glass

The glass is placed in front of the filter shade glass to protect gainst spatter. The protection glass should be replaced at regular intervals.
