Approvals

CE

Directions for use

A. Safety glass (polycarbonate)
The glass is used in shields with a flip-up front frame and should be placed nearest to the eyes to protect against slag or other articles while chipping/ grinding when the flip up front is open.
B. Filter shade glass
Filters out harmful infra-red and ultra-violet rays from the welding arc, and reduces visible light to a level which is sufficient to see the welding process without straining the welder's eyes. Filter Shade Glass should be selected based on welding process and

amperage. The glasses are marked Protane Shade SO 1 DIN 0196 CE

C. Protection glass

The glass is placed in front of the filter shade glass to protect against spatter. The protection glass should be replaced at regular intervals.
