

# ANTI SPATTER SPRAY. 6PCS

Product group: **196**      Product number: **633149**

Anti spatter spray, 400 ml in a box, 6 pcs.

## Product information

By spraying on a thin layer on each side of where the welding is to take place, a barrier is formed preventing the molten globules from burning on to the surface. The spatter can easily be wiped off with a brush after welding.

The anti spatter spray prevents the spatter from the welding arc from sticking to the metal surface being welded.

Time consuming chipping and grinding is prevented.

## Specification

### General

Invent Hazard Material (IMO/EU) classification	NA
