

# BRONZE-264 3.0 X 500MM 1,7KG

Product group: **093**      Product number: **174326**

Bare brazing rod for copper, copper alloys and steel.

## Product information

This product supersedes product no: **514240**

A bronze welding rod for braze welding of cast iron, steel, copper, brass, bronze and malleable castings. It can be used for joining dissimilar metals to each other and for overlaying bearings, gliding surfaces, etc. This rod is not flux-coated, and should be used with Unitor bronzeflux 261 PF.

### Features

- High tensile strength
- Low meltin point. Good melting flow

### Benefits

- Less possibility for joint to fail during operation
- Job is done faster
- Galvanized pipes can be brazed without destroying galvanizing
- Very user friendly

## Specification

### General

<b>Invent Hazard Material (IMO/EU) classification</b>	NA
---	----

## Directions for use

The label on each container fully identifies the contents, and also gives basic information on application areas. Complete information on each rod, and instructions for use are given in the handbook for Maritime Welders.
