CLEANING NEEDLES SET

Product group: **176** Product number: **175356**

Cleaning needles for welding attachments and cutting nozzles of UCT-500 gas welding and cutting kit.

Product information

Regular maintenance of welding attachment and cutting nozzles with cleaning needles will help ensure good performance and quality of work. Clogged nozzles with carbon deposits or slag may lead to backfire (popping sound).

Further information

When cleaning the nozzle's holes with the needles, these should run freely inside. Do not twist them, just stick them straight in and pull them out.
 Never use steel wire, reamers or spiral drills for cleaning. These can ruin the smooth surfaces of the hole. It is very important that the small holes in the sealing end of the cutting nozzles should not be enlarged in any way.
 Welding attachments and cutting nozzles may be carefully cleaned externally by means of a soft brass brush. Do not use a steel brush.

Specification

General

Invent Hazard Material (IMO/EU) classification	NA
--	----

Variants

Product name	Product number
CLEANING NEEDLES SET	175356
COUPLING NUT FOR SHANK ATTACHMENTS	174771
COUPLING SCREW FOR CUTTING NOZZLES	174813
SPANNER	174649
UCT-500 SPARE PART KIT	500100 (supersedes 174748)
VALVE ASSEMBLY BLUE FOR OXYGEN	174789
VALVE ASSEMBLY RED FOR ACETYLENE	613762
