

POTASSIUM HYDROXIDE FLAKES KOH 25 KG

Product group: 030

Product number: 4000120

Potassium Hydroxide (KOH) flakes are a highly alkaline, white solid used extensively in chemical tanker operations for tank cleaning and maintenance. Due to its strong caustic properties, it effectively removes organic residues, grease, and oil-based contaminants from cargo tanks, ensuring cleanliness standards required for the next cargo.

Product information

Other applications or uses: Potassium carbonate, potassium silicate, other potassium chemicals, detergents, food, rubber, agrochemicals, dyestuff, alkaline battery, etc.

Potassium Hydroxide is a corrosive substance. Proper PPE (gloves, goggles, protective clothing) must be worn during handling. Adequate ventilation and safety procedures should be in place when used onboard.

Specification

General

Invent Hazard Material (IMO/IU) classification	C-49
--	------

Physical properties

Appearance	White solid crystal flakes
Density [g/cm3]	1.0
pH	13.5 (in 0.1 M solution)

Technical data

Purity	Typically ≥ 90%
--------	-----------------

Documents

[SDoC and MD for IHM](#)
