WATER IN OIL REPLACEMENT CELL

Product group: **663** Product number: **532380**

Accessory: Replacement cell for the Water in Oil test kit.

This is the NEW digital cell with chargeable battery and PC connectivity for results download.

Product information

Unitor™ DIGI Water in Oil Cell is used for analysing water content in lubricating oil and fuel oil. It can be used to understand if excess water is present in the fuel and if actions are needed to reduce or remove the water. It provides a refreshed, but familiar, interface with the addition of smart features to enhance the user experience. You can easily set up sample points and transferred results to the computer. The unit is also chargeable and is capable of showing the number of tests available before charging is needed.

Test Parameter: Water in Oil

Used with:

- UNITOR EASYSHIP WATER TEST KIT (673155)
- UNITOR EASYSHIP REAGENT PACK WATER (773156)

Features

- Short testing time: 3 min
- Good accuracy

Benefits

- Instant indication of conditions for components allowing informed on-site maintenance decisions
- Robust and reliable for use in harsh or remote environments
